

Advertising Performance Analysis Report

Data-Driven Marketing Insights

Prepared by: **Abdulrahman Samir Awad**

Date: [12 – 2025]

1. Executive Summary

This report evaluates advertising performance using core metrics: Impressions, Clicks, Conversions, Spend, Revenue, CTR, CPC, and ROAS.

The objective is to identify profitable areas, detect budget loss, and improve overall return on investment.

2. Overall Performance Overview

- ROAS clearly separates profitable and losing campaigns
 - High CTR does not always lead to high conversions
 - Spend is heavily concentrated in a small number of campaigns
 - Several campaigns operate at a loss
-

3. Audience Insights

- Specific age groups deliver higher ROI
 - Gender performance shows clear efficiency gaps
 - Major cities drive most conversions
 - Mobile devices generate most traffic
 - Desktop users often show stronger ROAS
 - OS type impacts both CPC and Conversion Rate
-

4. Campaign Performance

- A small number of campaigns generate most revenue
 - Multiple campaigns show ROAS below 1
 - High spend does not guarantee strong performance
 - Underperforming campaigns require immediate optimization or shutdown
-

5. Ad-Level Performance

- Some ads attract clicks without real conversions
 - Best-performing ads combine:
 - High CTR
 - Low CPC
 - Strong ROAS
 - Ad text analysis shows that wording directly affects conversion behavior
-

6. Time-Based Performance

- Clear peak days and peak hours for conversions
 - Each platform has different optimal time windows
 - Budget scheduling can significantly increase efficiency
-

7. Key Problems Identified

- Budget leakage from low-ROAS campaigns
 - Weak conversion performance after clicks
 - Poor audience targeting in some segments
 - Inefficient time scheduling
-

8. Final Recommendations

- Scale campaigns with ROAS above 2
 - Pause campaigns with ROAS below 1
 - Optimize bidding for top hours and days
 - Refine audience targeting by age, gender, and city
 - Improve landing page and funnel performance
 - Continuously test ad creatives and copy
-

9. Business Impact

If the recommendations are applied:

- Advertising waste will decline
 - Conversion efficiency will rise
 - Revenue will grow with the same or lower budget
 - Decision-making will become fully data-driven
-

10. Conclusion

This analysis provides a complete performance diagnosis for advertising operations. It enables smarter budget control, higher profitability, and scalable campaign growth.
